

# Door Mirrors

---

## Reverse mirror dipping

Vehicles with driver's seat memory have a pre-stored function, which causes the door mirrors to dip whenever reverse gear is selected, giving the driver a view of the kerbside.

When this feature is first turned on, the mirrors will dip to a pre-set amount. See **SELECTING SETTINGS OPTION, 81**. The degree of dipping can be programmed using the following sequence:

1. Insert the starter key and turn it to position **II**.
2. Adjust the seat and the exterior mirrors to the correct position and perform a memory-store routine.
3. Select reverse gear - the mirrors will dip to a pre-set level.
4. Adjust the mirrors to the required dipped position.
5. Perform a memory-store sequence.
6. **DOOR MIRROR DIP STORED** will appear on the message centre.
7. A single chime will sound from the instrument pack.

*This feature can be enabled or disabled by a Land Rover Dealer/Authorised Repairer or by the driver. See **SELECTING SETTINGS OPTION, 81**.*
